PROFILE

I describe myself being a Front-End Developer and real estate enthusiast. Both of these aspects are fully integrated into my life and, although achieved with a couple of detours, reflect the career path I have always dreamed of.

Started as an Internal Auditor I was able to make use of my idea of efficient and pragmatic processes ever since. As a developer I now have the necessary background to apply my knowledge of business processes to combine it with state-of-the-art technology to contribute to the digital transformation in Germany.

EDUCATION

mehmet.deveci@homeday.de

EXPERIENCE

AUG 2022 - present

JUNIOR FRONT-END ENGINEER

Homeday GmbH, Berlin

Driving general projects within the engineering department (e.g. new onboarding process).

Web development aligned to the strategies and goals of the company and with a clear focus on the customer's needs, using the following technologies and methodologies:
- VueJS as a framework for JavaScript to create product components
- SASS/SCSS to sustainably apply the styles of the existing design system
- Github for version control and working together with fellow engineers
- JIRA for agile project management (SCRUM)
- sentry.io for error tracking in live system

2019 - JUL 2022

Supply Operations Manager

Project Manager Operations

Homeday GmbH, Berlin

Examination of current processes alongside the entire operational organization with main focus on partner realtors.
Elaboration of countermeasures and improvements including:
- definition of new processes and tracking measures
- workshop design
- supplier research and onboarding
- achieving scalability by using third party tools to automate proccesses

2014 - 2019

Internal Auditor

to 2019 Kraftverkehr Nagel SE & Co. KG, Versmold

to 2018 Hella KGaA Hueck & Co. KG, Lippstadt

Examination of current processes with focus on weaknesses and elaboration of countermeasures and improvements to reduce risks. Used skills:
- data analysis of finance data in ERP Systems
- communication with all types of people
- fast adoption to new processes and workflows
